SUMMARY

Self-taught, **Google Certified Python Developer** with **5+ years** of experience building scalable backend systems, REST APIs, and production infrastructure. Shipped systems serving **10K+ users**, cut infrastructure costs by **90%**, and delivered **20x performance improvements**. Currently building AI chatbots with **OpenAI & Gemini LLMs** and **RAG pipelines (LangChain, Pinecone)** while owning the full cloud & DevOps stack.

SKILLS

Backend

Python

Django

Django REST Framework

FastAPI

Celery

SQLAlchemy

PostgreSQL

Redis

Web Scraping

AI & LLM

OpenAI API

Gemini API

LangChain

RAG

Pinecone

Prompt Engineering

AI Chatbots

Cloud & DevOps

Docker

Docker Compose

GitHub Actions (CI/CD)

Nginx

Linux (Ubuntu)

AWS S3

PgBouncer

SSL / DNS

Git

PROFESSIONAL EXPERIENCE

- Nexby AI Solutions Pvt. Ltd. (Parent company Atishay Limited)

Backend Developer • Mumbai, India

Oct 2024 – Present
- Atishay Limited

Python Developer • Mumbai, India

Sep 2023 – Sep 2024
- Caplist (Mavenup Technology)

Software Engineer • Oslo, Norway

Feb 2023 – Aug 2023
- Nimap Infotech

Python Django Developer • Lower Parel, India

Feb 2021 – Feb 2023

KEY PROJECTS

- Nexby AI Solutions Pvt. Ltd. (formerly Atishay Limited)

Sep 2023 – Present

- Reduced monthly infrastructure costs by **90% (₹1L to ₹10K)** through server optimization and architecture restructuring.
 - Sole DevOps owner — managed **Ubuntu VPS production servers**, set up **PostgreSQL + PgBouncer**, executed full **server & database migrations**, configured **SSL, DNS, domains, and Nginx reverse proxy**.
 - Built an AI chatbot platform using **OpenAI & Gemini LLM APIs** integrated with **WhatsApp**, serving multiple business clients.
 - Developed **Retrieval-Augmented Generation (RAG)** pipelines with **LangChain** and **Pinecone vector search** — document ingestion, file sharing, and **AWS S3** knowledge storage.
 - Led and contributed to the development of **SalesX** (marketing automation) and an **HR recruitment system** using Django.
 - Set up **CI/CD pipelines** using GitHub Actions, containerized all applications with **Docker**.
 - Led and contributed to the development of web scraping bots for automated data collection and analysis.
 - Led backend architecture discussions, mentored junior developers, coordinated cross-functional delivery, and resolved technical blockers.

- Optimized shareholder **CAP-TABLE upload from 50s to 2.5s** (20x improvement).
- Built APIs for **live voting**, shareholder communication, and certificate downloading.
- Enhanced email delivery systems to reduce bounce rates and improve deliverability.
- Improved platform performance and localization for **Norwegian and English** audiences.

Nimap Infotech (Monexo & LendenClub Techserve LTD)

Feb 2021 – Feb 2023

- Created APIs for a platform that handles **10K+ users** and wrote automated and time-based scripts.
- Wrote a **decision-making engine** for processing loans as per their credit score.
- Built APIs and created **CMS** for the internal team.
- Developed **microservice-based architecture** for ENACH system.
- Automated the process of ENACH and Physical NACH.
- Reduced the tech team's monitoring workload by automating **cronjob status tracking**.
- Automated sending **NOC letters** by generating PDFs.
- Containerized the CMS system backend using Docker.

PERSONAL OPEN SOURCE PROJECTS

P.O.D.S. (Postgres Orchestrated Docker Stack)

github.com/jackiedabekar/pods

- High-availability **PostgreSQL 18 cluster** (1 primary + 2 read replicas) with native **streaming replication** and **PgBouncer** transaction-mode pooling, fully orchestrated with **Docker Compose**.
- Dynamic replica scaling via CLI, **FastAPI** health API with replica auto-discovery, **Prometheus + Grafana** monitoring, and scheduled backups with **WAL archiving** and **S3** support.

S.M.O.L. (Shrink My Oversized Links)

github.com/jackiedabekar/smol

- High-performance asynchronous URL shortener built with **FastAPI**, **SQLAlchemy**, and **PostgreSQL**, with collision-resistant short keys.
- Read-through **Redis caching** layer for sub-millisecond redirects on hot links, with database fallback and cache repopulation for cold links.

CERTIFICATIONS

- **Application Development - Python**
Google
- **Crash Course for Python**
Coursera
- **Using Python to Interact with OS**
Coursera
- **Introduction to Git and GitHub**
Coursera
- **Docker with Hands-On Lab**
KodeKloud

EDUCATION

Bachelor in Computer Science (Partially Completed)
St. John College of Engineering & Management, Palghar
2015 – 2020

Higher Secondary Education
Uttkarsha Vidyalay, Virar
2013 – 2015

Secondary School Certificate
J.B.S English High School, Nallasopara
2004 – 2013

LANGUAGES

English	Professional
Hindi	Professional
Marathi	Native
Gujarati	Conversational
