SUMMARY

Self-taught, **Google Certified Python Developer** with **5+ years** of experience building scalable backend systems, REST APIs, and production infrastructure. Shipped systems serving **10K+ users**, cut infrastructure costs by **90%**, and delivered **20x performance improvements**. Currently building AI-powered chatbots with LLM/RAG pipelines while owning the full DevOps stack.

SKILLS

Python

Django

Django REST Framework

FastAPI

Celery

PostgreSQL

PgBouncer

Docker

Docker Compose

Nginx

Linux

AWS S3

GitHub Actions

Git

LLM / RAG

Web Scraping

PROFESSIONAL EXPERIENCE

- **Nexby AI Solutions Pvt. Ltd.** (Parent company Atishay Limited) Oct 2024 – Present
Backend Developer • Mumbai, India
- **Atishay Limited** Sep 2023 – Sep 2024
Python Developer • Mumbai, India
- **Caplist** (Mavenup Technology) Feb 2023 – Aug 2023
Software Engineer • Oslo, Norway
- **Nimap Infotech** Feb 2021 – Feb 2023
Python Django Developer • Lower Parel, India

KEY PROJECTS

- Nexby AI Solutions Pvt. Ltd.** (formerly Atishay Limited) Sep 2023 – Present
 - Reduced monthly infrastructure costs by **90% (₹1L to ₹10K)** through server optimization and architecture restructuring.
 - Sole DevOps owner — set up **PostgreSQL + PgBouncer**, executed full **server & database migrations**, configured **SSL, domains, and Nginx**.
 - Integrated **LLM-based APIs with WhatsApp** for intelligent chatbots serving multiple business clients.
 - Developed **RAG architecture** with file sharing and **AWS S3** integration to enhance chatbot intelligence.
 - Built **SalesX** (marketing automation) and an **HR recruitment system** using Django.
 - Set up **CI/CD pipelines** using GitHub Actions, containerized all applications with **Docker**.
 - Built web scraping bots for automated data collection and analysis.
 - Led team task alignment and resolved cross-team technical blockers.
- Caplist** (Product to manage organised AGM & BM) Feb 2023 – Jun 2023
 - Optimized shareholder **CAP-TABLE upload from 50s to 2.5s** (20x improvement).
 - Built APIs for **live voting**, shareholder communication, and certificate downloading.
 - Enhanced email delivery systems to reduce bounce rates and improve deliverability.
 - Improved platform performance and localization for **Norwegian and English** audiences.

- Created APIs for a platform that handles **10K+ users** and wrote automated and time-based scripts.
- Wrote a **decision-making engine** for processing loans as per their credit score.
- Built APIs and created **CMS** for the internal team.
- Developed **microservice-based architecture** for ENACH system.
- Automated the process of ENACH and Physical NACH.
- Reduced the tech team's monitoring workload by automating **cronjob status tracking**.
- Automated sending **NOC letters** by generating PDFs.
- Containerized the CMS system backend using Docker.

CERTIFICATIONS

- **Application Development - Python**
Google
- **Crash Course for Python**
Coursera
- **Using Python to Interact with OS**
Coursera
- **Introduction to Git and GitHub**
Coursera
- **Docker with Hands-On Lab**
